PERANCANGAN INTERIOR PADA PLANETARIUM DAN OBSERVATORIUM JAKARTA

Sejak dahulu manusia memiliki beragam pertanyaan mengenal langit, antariksa, planet, bintang dan galaksi. Planetarium dan Observatorium telah menjadi solusi untuk menjawab semua pertanyaan manusia mengenai tata surya. Jakarta merupakan ibu kota Indonesia telah memiliki fasilitas ini, tetapi minat masyarakat untuk mengunjungi tempat ini sangat memprihatinkan. Supernova merupakan inspirasi konsep dari perancangan ini; merupakan Proses akhir hidup suatu bintang di alam semesta, dimana bintang adalah benda langit yang indah dan dapat dinikmati semua manusia secara kasat mata.

KataKunci : Planetarium, Jakarta, Supernova, Bintang

ABSTRACT

Since the very beginning human have a variety of questions about the sky, space, planets, stars and galaxies. Planetarium and Observatory has become a solution to accommodate all human questions about the solar system. Jakarta which is the capital city of Indonesia has this facility, but the interest of the community to visit this place is very alarming. Supernova is the inspiration of this design concept; the end of life process of a star in the universe, where the stars are celestial bodies that are beautiful and can be enjoyed by all human beings with naked eyes. With this interior design project, Jakarta Planetarium and Observatory is expected to answer questions about celestial bodies that are often seen, such as the star and capable to be an attractive recreation and education medium which arouse the imagination of visitors.
